AGI	Industrial Floors: **Reaction Polymers** Impregnation, topcoat, coating, reaction polymer overlay	**Work Sheet** **A 80**

Contents

1 Scope of use
2 Definition of terms
3 Coating materials
3.1 General
3.2 Binders
3.2.1 Epoxy (EP)
3.2.2 Polyurethane (PUR)
3.2.3 Polymethyl methacrylate (PMMA)
3.2.4 Special systems
3.3 Admixtures
4 Existing floor
4.1 Concrete, cementitious overlays
4.2 Anhydrite overlays
4.3 Magnesite overlays
4.4 Ceramic tiles
4.5 Mastic asphalt overlays
5 Why do we use reaction polymers?
5.1 Purpose of surface treatments
5.2 Thermal loads
5.3 Outdoor use
5.4 Increased risk of slipping
6 Application
7 Information for specification
8 Standards, regulations, guidelines
